EDUCATION

Indira College of Engineering and Management, Pune

Expected: May 2028

B.Tech in Information Technology | CGPA: 8.14/10.00

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Web Development

TECHNICAL SKILLS

- **Programming Languages:** C++, Python (Intermediate), HTML, CSS, SQL
- **Web Technologies:** HTML5, CSS3, React.js, Node.js, Responsive Web Design
- **Databases:** MySQL, MongoDB, Firebase, Supabase
- **Developer Tools:** Git, GitHub, VS Code
- **Design & Development:** Figma, Canva, HTML5, CSS3
- **Practices:** Software Development, Software Testing, Debugging, Robotic Process Automation, UI/UX Design

CERTIFICATIONS & TRAINING

Virtual Internship – Google Cloud Generative AI

Sep 2025 — Oct 2025

SmartBridge & SmartInternz

- Completed a virtual internship focused on Generative AI and Google Cloud, gaining practical understanding of AI concepts and cloud-based applications.
- Applied Generative AI concepts to practical tasks and developed an understanding of AI-powered application development.

Introduction to Automation

Nov 2025

UiPath

- Successfully completed the Introduction to Automation course, gaining foundational knowledge of automation.
- Developed an understanding of automation concepts relevant to RPA and automated workflows.

Software Testing Tutorial Module – Scaler Topics

Nov 2025

Scaler Topics

- Completed training covering software testing fundamentals, testing approaches, and software quality practices.
- Gained foundational understanding of test planning, defect identification, and debugging concepts.

PROJECTS

LendIt – Hostel Sharing Platform

React, TypeScript, Supabase, Figma, Vite

- Developed a student-focused web application using React.js, TypeScript, and Supabase for exploring and sharing hostel accommodation information.
- Designed an intuitive UI in Figma and implemented reusable React components with database integration.
- Applied responsive web design principles to create a user-friendly experience across different screen sizes.

Green Credits – Sustainability Platform

React.js, Vite, JavaScript, HTML5, CSS3, Supabase, PostgreSQL, Git & GitHub

Mar 2026 — Apr 2026

- Developed a web-based sustainability platform using React.js, JavaScript, Supabase, and PostgreSQL to encourage students to participate in eco-friendly activities.
- Implemented activity submission and verification workflows, enabling users to earn digital credits after approval.
- Developed environmental impact tracking, credit history, and leaderboard features to monitor user contributions and engagement.
- Integrated frontend components with a database-backed system for storing and managing activity and credit information.
- Used Git and GitHub for version control during development.
